CJC Markets Co., Limited is committed to the highest standards of the Anti-Money Laundering (AML) compliance and Counter-Terrorism Financing (CTF). To help the government fight the funding of terrorism and money laundering activities, law requires all financial institutions to obtain, verify, and record information that identifies each person opening an account

Money laundering – the process of converting funds, received from illegal activities (such as fraud, corruption, terrorism, etc.), into other funds or investments that look legitimate to hide or distort the real source of funds.

The process of money laundering can be divided into three sequential stages:

- Placement. At this stage, funds are converted into financial instruments, such as checks, bank accounts, and money transfers, or can be used for purchasing high-value goods that can be resold. They can also be physically deposited into banks and non-bank institutions (e.g., currency exchangers). To avoid suspicion by the company, the launderer may as well make several deposits instead of depositing the whole sum at once, this form of placement is called smurfing.
- Layering. Funds are transferred or moved to other accounts and other financial instruments. It is performed to disguise the origin and disrupt the indication of the entity that made the multiple financial transactions. Moving funds around and changing in their

form makes it complicated to trace the money being laundered.

- Integration. Funds get back into circulation as legitimate to purchase goods and services.
